Medical Recliner Systems

- Over two decades of heating expertise
- Used by leading healthcare recliner manufacturers
- Backed by our comprehensive warranty
- IEC 60601 Certified
- Designed and assembled in the USA

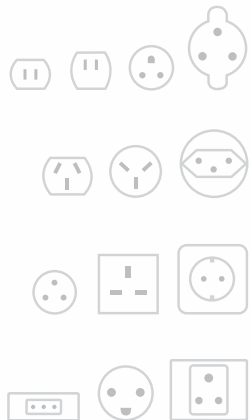

Dialysis, Oncology and Recovery Rooms

Our heat and massage systems are designed to provide comfort, relaxation and an improved patient experience. Transfusion therapy patients in hospitals and treatment centers can now be offered this essential benefit.

Global Compatibility

Heat and massage systems from Check Healthcare are designed to be used internationally.

Each system comes equipped with the proper outlet plug for your environment. The integrated control system will automatically adjust to the input voltage.
